DETAILED ACTION

Claims 1-6 are currently pending.

Restriction Requirement

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 4, and claims 3, 6 (in-part) drawn to first structure-relationship method, classified in class 703, subclass 11.
- II. Claims 2, 5, and claims 3, 6 (in-part) drawn to second structure-relationship method, classified in class 703, subclass 11.

The inventions are distinct, each from the other because of the following reasons:

Inventions I-II are directed to related methods. The methods do not share a special technical feature because each method contains specific and unique method steps which are not shared by another method. Thus, method of Group II requires, for process B1, *molecules that are superposed in virtual space to include a ring structure, and then generating an imaginary atom at a position representing said ring structure*, and then, for process B2, *using virtual space and imaginary atom for calculating interactomic distances* – these steps are not required by method of Group I. Conversely, method of Group I requires, for process B1 calculating coordinates of the respective atoms contained in plural molecules, not required for method of Group II.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).
